

**2009 PROGRAM INFORMATION**

- 1) Please have your request and seed on hand by April 17.
- 2) Instead of requiring 50 lbs. of cottonseed for each entry in the variety tests (as in the past), we now ask for at least 5.0 pounds of seed for an entry in the first test and 2.5 pounds of seed for that same entry in each additional test.
- 3) The strains tests seed requirements will remain the same, i.e., we will need at least 2.5 pounds of seed per entry per test.
- 4) To avoid unnecessary delays in the publication of results, name changes for varieties and strains will only be accepted through December 1 of the current year.
- 5) If possible, 5.0 to 10.0 lbs. extra seed of the National and Regional Standards would be appreciated. Should re-planting of multiple tests be necessary, the re-planting would not be delayed due to a lack of seed.
- 6) Printed copies of the 2008 Variety Test Report will be mailed soon. However, it can be obtained online. Here is the direct link to the 2008 Variety Test Report:
